

Customer Journey Map

Customer Journey Map — PocketSmart AI

1. Discover

The user reaches the PocketSmart AI landing page and sees the purpose of the application.

2. Register and Login

The user creates an account and logs in. Authentication protects the planner and history pages.

3. Choose a Planner

The dashboard provides access to Home, Party and Jewelry planning.

4. Enter Requirements

The user supplies a budget and planner-specific details. The Jewelry planner can also accept an outfit image.

5. Generate Recommendations

The application validates the input, sends a structured request to Gemini, parses the response, and adds shopping links.

6. Review and Shop

The user reviews categories, item recommendations, estimated prices and links.

7. Return

The dashboard shows recent recommendations and the History page keeps the available recommendation records in memory.

8. Logout

The user logs out and protected pages require authentication again.
